

*On behalf of our Montessori Children's House of Hayward Preschool, I would like to extend our sincerest gratitude for your support and positive feedback during this time of learning! Our families and parents are truly the cornerstone of our program and you are what makes our classroom so unique and special. I would also like to extend our deepest appreciation to each one of you for being instrumental in helping us provide a successful classroom for your children. I would not have been able to run such a program without your help and support! Please continue to monitor your emails for the most up to date information and announcements.*

## *FIRST MONTH OF OUR CLASSROOM*

*LISA's class*

*I had so much fun putting together our Montessori curriculum for the combination of learning and playing. I hope your children had a blast learning in this program. This month, your child will learn a lot about APPLE.*

*This upcoming Monday Sept-27-2020, we will have a simple activity to celebrate the birthday of "JOHNNY APPLESEED". I will have the small demonstration of cutting 3 types of apple (Red apple, Granny Smith-green apple, and Honeycrisp - pink & light orange) for our lesson. I wish I can serve them for all children to enjoy as many years ago (For safety, this year I cannot serve any foods for children). It will be wonderful if you can also have 3 types of apple for your child as snacks during snack time. Through that experience, your child will have a chance to learn about the different types of APPLES. They will learn what makes an APPLE and will be able to enjoy the taste of different APPLE as well.*
